

## *Sliding Scale Reference Chart*

\$90-150 is a suggested scale of payment per intake and includes a free follow-up session. Additional follow up appointments are \$40-80 (sliding scale) for a 45minute session. Intake sessions generally last 60-90 minutes, with an average of 2-3 hours of research, formulation and charting taking place after we meet.

A sliding scale is a tool used to help offer more equitable access to my services, while honoring my time. When implemented effectively, everyone pays a similar percentage of their income for the same services. Additionally, when more people are able to pay at the upper end of this scale, I am able to offer my products and services free of charge to those currently unable to pay. I don't require income verification and I understand that finances often fluctuate. I trust you to pay what is fair. Thank you for participating!
